

Binary to Decimal Conversion Table 1-12 - v0.1

1												#	Word 1:
	1024	512	256	128	64	32	16	8	4	2	1		
2												#	Word 2:
	1024	512	256	128	64	32	16	8	4	2	1		
3												#	Word 3:
	1024	512	256	128	64	32	16	8	4	2	1		
4												#	Word 4:
	1024	512	256	128	64	32	16	8	4	2	1		
5												#	Word 5:
	1024	512	256	128	64	32	16	8	4	2	1		
6												#	Word 6:
	1024	512	256	128	64	32	16	8	4	2	1		
7												#	Word 7:
	1024	512	256	128	64	32	16	8	4	2	1		
8												#	Word 8:
	1024	512	256	128	64	32	16	8	4	2	1		
9												#	Word 9:
	1024	512	256	128	64	32	16	8	4	2	1		
10												#	Word 10:
	1024	512	256	128	64	32	16	8	4	2	1		
11												#	Word 11:
	1024	512	256	128	64	32	16	8	4	2	1		
12												#	Word 12:
	1024	512	256	128	64	32	16	8	4	2	1		

Binary to Decimal Conversion Table 13-24 - v0.1

13												#	Word 13:
	1024	512	256	128	64	32	16	8	4	2	1		
14												#	Word 14:
	1024	512	256	128	64	32	16	8	4	2	1		
15												#	Word 15:
	1024	512	256	128	64	32	16	8	4	2	1		
16												#	Word 16:
	1024	512	256	128	64	32	16	8	4	2	1		
17												#	Word 17:
	1024	512	256	128	64	32	16	8	4	2	1		
18												#	Word 18:
	1024	512	256	128	64	32	16	8	4	2	1		
19												#	Word 19:
	1024	512	256	128	64	32	16	8	4	2	1		
20												#	Word 20:
	1024	512	256	128	64	32	16	8	4	2	1		
21												#	Word 21:
	1024	512	256	128	64	32	16	8	4	2	1		
22												#	Word 22:
	1024	512	256	128	64	32	16	8	4	2	1		
23												#	Word 23:
	1024	512	256	128	64	32	16	8	4	2	1		
24	Word 24: calculated by your hardware wallet. This word is not rolled by hand. It contains the mandatory BIP-39 checksum, which can only be derived mathematically from the previous 23 words, it isn't a free choice like the others. Once you've entered words 1–23 into a compatible hardware wallet (e.g. SeedSigner, Jade+, Foundation Passport), the device will calculate and display word 24 for you.
